3.1.4 Video - AI in Action
Explore CopyAI
Part 2: Explore Access Options and Pricing Information
Click Pricing on the website.
List access options and the cost associated with each option.
Answer Area
According to the Pricing in Self-Serve there is:
"Chat" for 29 US$/month monthly.

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

Copy and paste the questions from the lab and include your answers after.

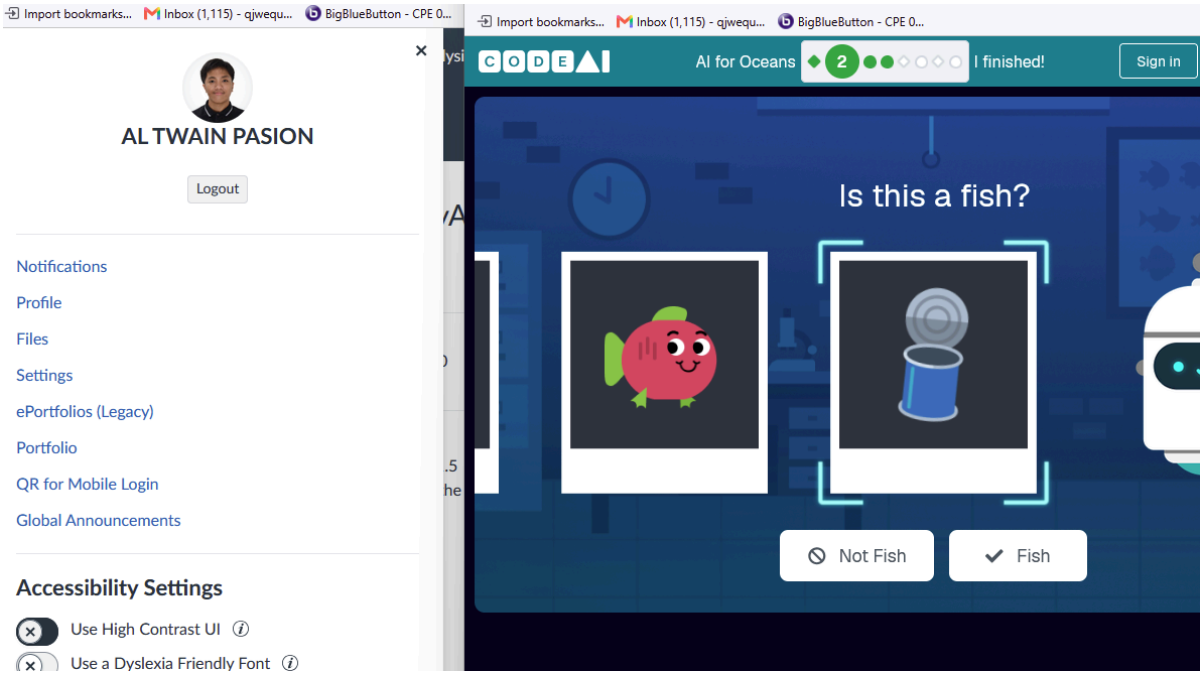

AII for Oceans via Code.orgLinks to an external site.

Complete all required exercises
Document and add your observation per step
Provide the Certificate of Completion

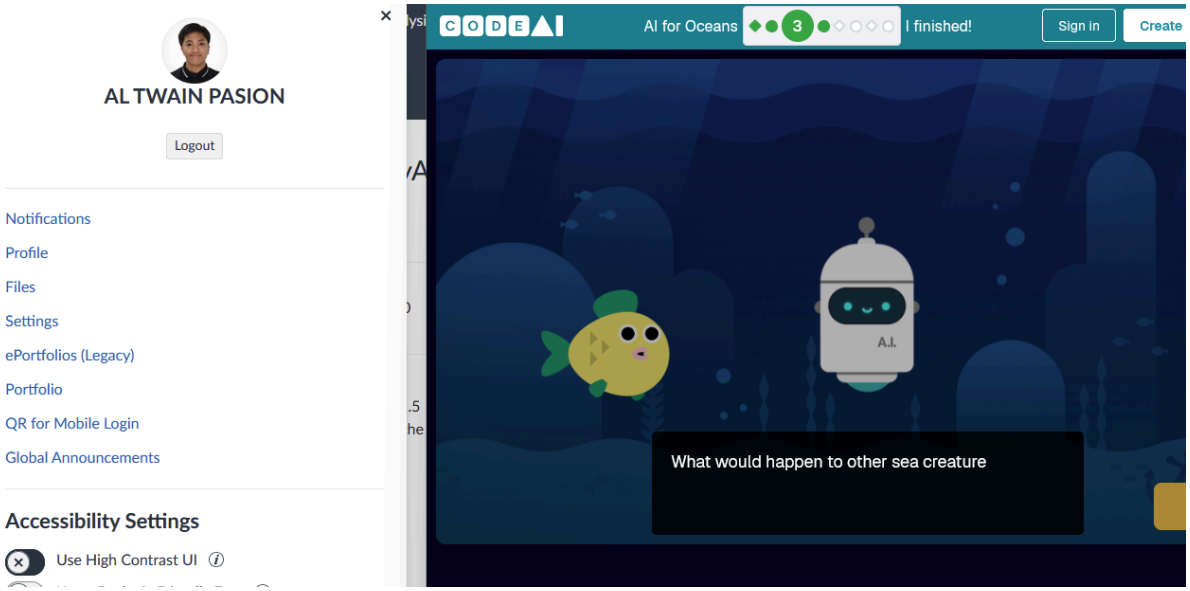

SUPPLEMENTAL ACTIVITY

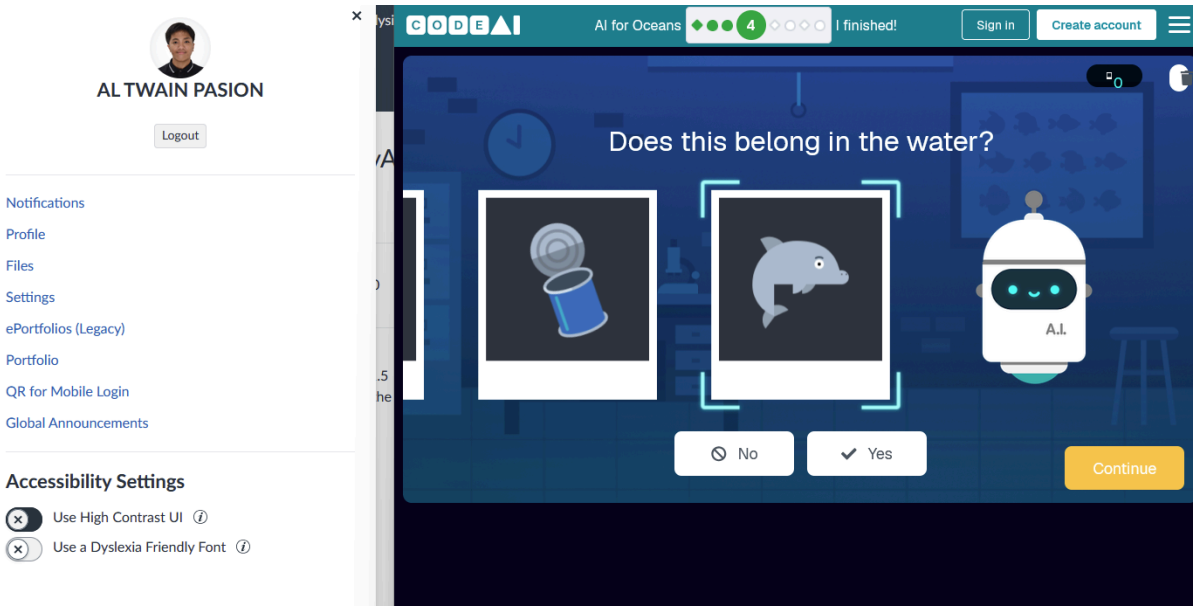

ANALYSIS:
This video gives a brief description on what Machine Learning is and how it learns. Machine learning learns from the data that we give, and it requires a lot of this.

ANALYSIS:
This interactive activity requires us to give the right data to an AI robot. It is important that we pick the right identification of the object for it may affect the performance of the robot. Since machine learning doesn't know what's right or wrong, it is up to us to teach it with the data.

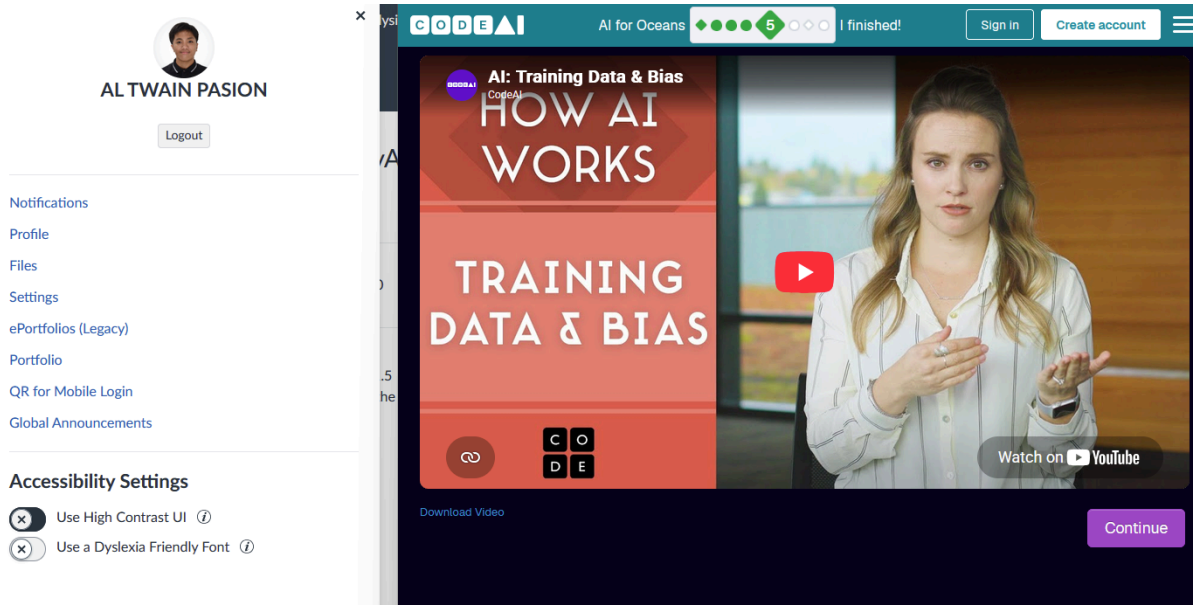

ANALYSIS:
Now after the interactive activity it then tests out the robot's knowledge. From my attempt I did around 200 inputs and it successfully identified all fishes and not fishes.

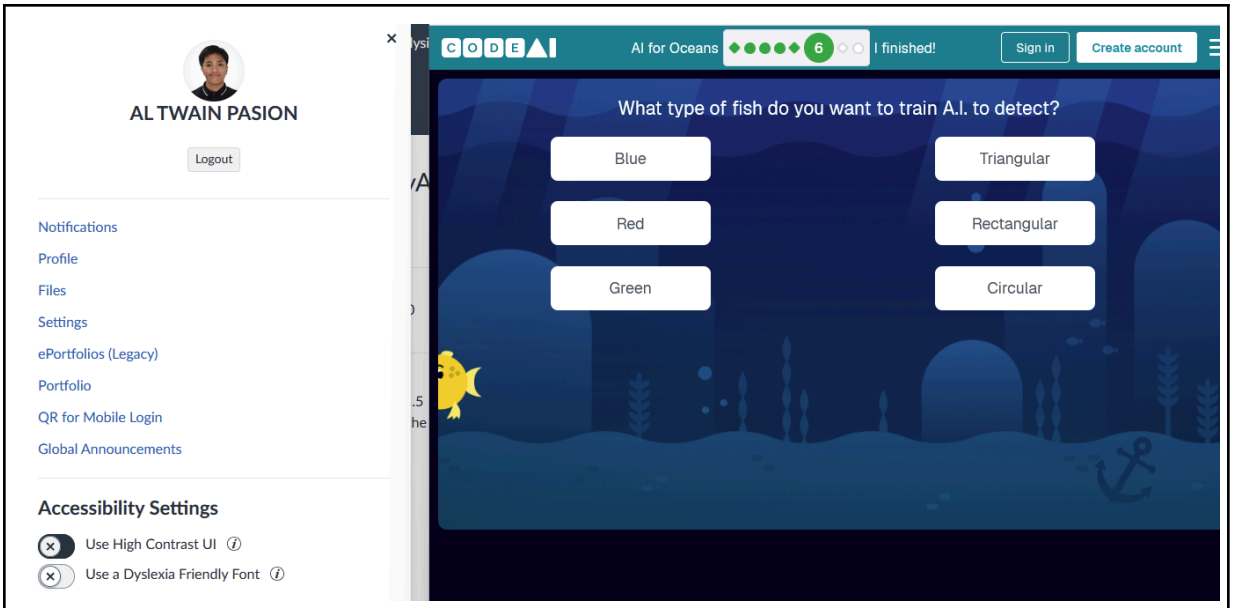

ANALYSIS:

This activity introduces us to how the robot can only make right decisions based on the data that we give. For example, it reads the normal fish as “fish” but classifies a dolphin as “not fish”. This topic will be tackled by the next video. This particular learning activity lets us teach the robot more diverse fish species other than the common ones.

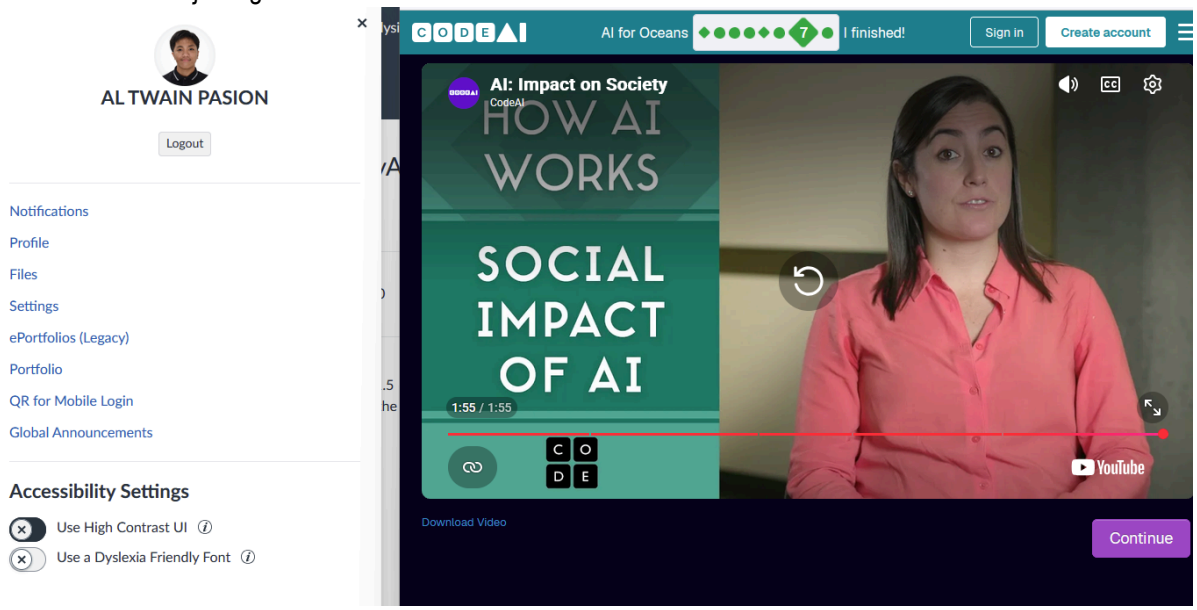

ANALYSIS:

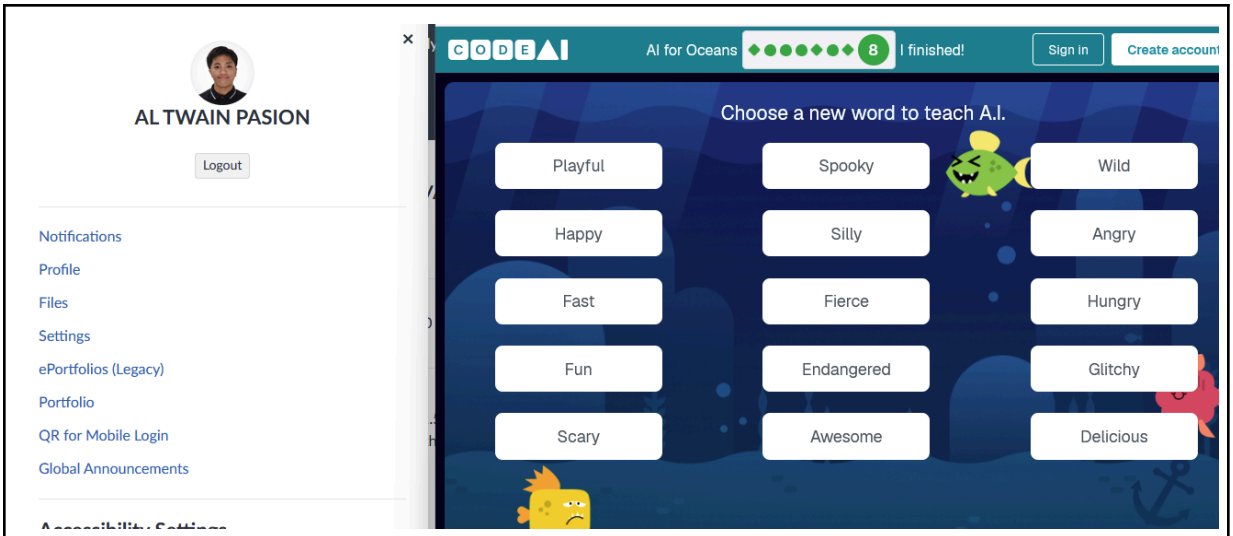

This video covers how important it is to give “generalized” data to an AI . The term “Data Bias” means that the AI only accepts what it has learned and seen. Similar to the fish and dolphin problem before, we only accounted for fishes with the same body type and species, but not all fishes like dolphins , starfishes, or seahorses.

ANALYSIS:
This activity now lets us teach the AI not what kind of "fish", but the type of fish based on their characteristics. I picked the rectangular option here. After feeding it the data, around 100 again, and testing it, it perfectly identified all the objects given to it

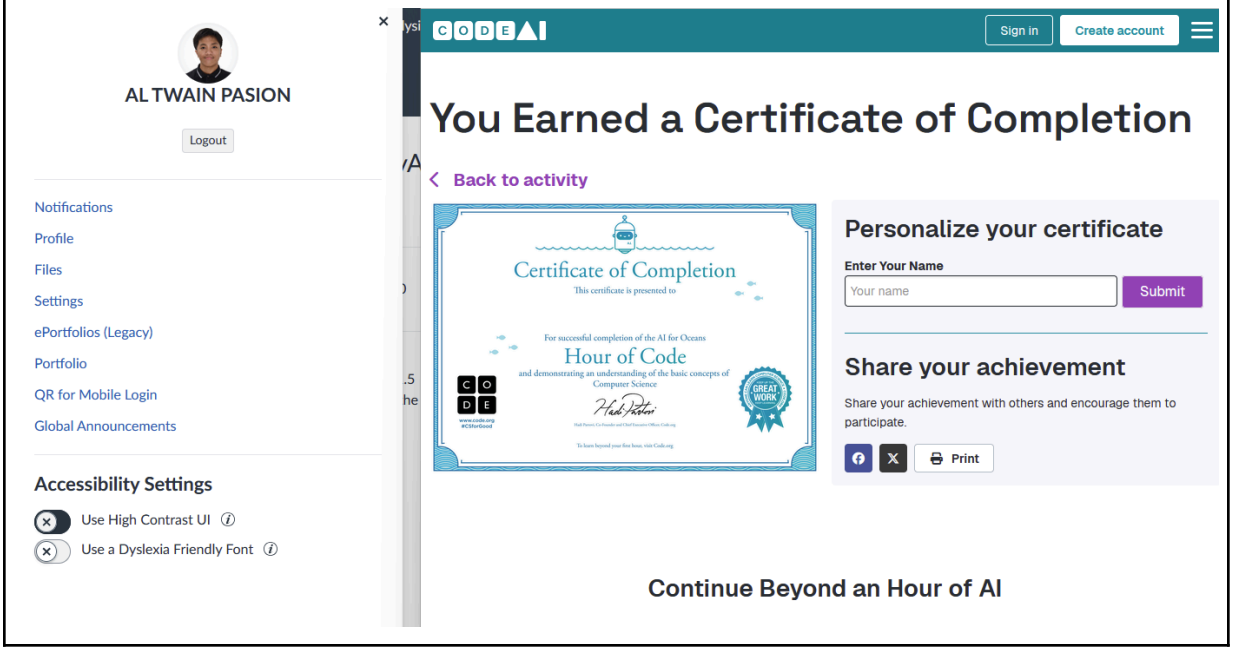

ANALYSIS:
The video shows us what AI is capable of in the present day, but it comes with warnings and cautions. AI has been able to help humanity in making automated driving, disease detection, and assisting the disabled. The only caution here is the "Bias". Since we are human beings, we all have different races thus there are "stereotypes". The video tells us that we should avoid feeding it specified data and try more diverse data.

ANALYSIS:

This last activity applies the concept of the last video, we're now giving the AI data that are generalized for all kinds of fishes. For my attempt, I picked the happy emotion to teach the AI. After giving it data and testing it, it successfully identified which ones are happy or not. It also has this column bar chart that shows what body part it needed to identify the most.

CERTIFICATE OF COMPLETION

3. ARTIFICIAL INTELLIGENCE (AI) USE DISCLOSURE STATEMENT

I hereby declare that artificial intelligence (AI) tools were used, if applicable, in the preparation of this academic work. The following indicates the nature and extent of AI assistance:

Tools Used: _____

Examples: ChatGPT, Microsoft Copilot, Grammarly, QuillBot, etc.

Purpose of Use: _____

Examples: grammar correction, idea generation, formatting, summarization, code assistance, explanation of concepts, etc.

Extent of Use: _____

Explain how AI was used and confirm that it did not replace original thinking, analysis, authorship, or completion of the required work.

By submitting this activity, I affirm that my use of AI complies with T.I.P.'s AI usage policy and does not exceed the permitted limits for similarity, automated content generation, or academic assistance.

I understand that any false, incomplete, or misleading disclosure may be subject to investigation in accordance with due process and may result in sanctions for violation of existing T.I.P. policies.

Lab activities, templates, and related instructional materials shall not be reuploaded, reproduced, distributed, or shared with external organizations or third parties without the prior express written permission of the Technological Institute of the Philippines.
